Electricity key contract features					
Cooling off period	10 business days.				
Eligibility	Residential customers in the distributor area must have the Minimum solar PV capacity and Minimum sonnenBatterie useable capacity for the relevant sonnenFlat plan.				
Special Credit	Customers must contract for sonnenFlat with their sonnenBatterie purchase to be eligible for the Special Credit . For the relevant sonnenFlat plan, a Special Credit equalling the Monthly fee will apply each month, up to the total credit amount state above. This will result in \$0 monthly fee for a duration of 24 months.				
Adjusted Annual Usage Allowance	Each household must produce the Minimum Annual Generation quantity of energy over a 12-month period. Where the annual energy production falls below the Minimum Annual Generation , the Annual Usage Allowance will be reduced proportionally to the shortfall in the Minimum Annual Generation . e.g.: For sonnenFlat Economy , if actual annual solar production is 6,000 kWh, then the Adjusted Annual Usage Allowance is => $7,500 \times 6,000 / 6,050 = 7,438$ kWh.				
Excess Usage Rate	Once the Adjusted Annual Usage Allowance is exceeded, subsequent usage from the grid will be charged at the Excess Usage Rate .				
Solar feed-in Rate	Energy exported above the Annual Export Threshold will be paid at the Solar feed-in Rate .				
Early termination	Annual Usage Allowance and Minimum Annual Generation will be reduced pro-rata where a customer ends the agreement within a 12-month period.				

Metering	Measurements from sonnenBatterie meters and regulated NMI meters will be used to determine Annual Usage Allowance and Minimum Annual Generation . Measurements from NMI meters will be used to determine exported energy and excess grid usage . Regulated NMI meters must be interval meters.
Battery Operations	sonnen may operate the sonnenBatterie remotely at its sole discretion.
